as in Bonn Germany the opening night of his first tour in over 3 years, the show was 60th birthday. And while he didnt know it then, the show went so well and the audio d his 25th CD and very first official DVD: Living Out of Time LIVE. Robin He is legendary, one of the finest guitarists in Rock n Roll history. In the early days pared to Jimi Hendrix, but in truth Robins bluesy/psychedelic Fender Strat style has he audience was spellbound throughout the powerful show which included four of his earliest songs -- considered his greatest hits, four songs from the studio album Living Out of Time (released in February 2004), plus a sprinkling of his best songs recorded during the decades in between. All songs were written or co-written by Robin Trower. Playing a Robin Trower signature Fender Strat -- an instrument which has been recently made available to the public -- Robin's performance was positively inspired. He fingers havent lost any of their cunning dexterity, and the guitar's tone and dynamics are still uniquely his. At 60 years of age, Robin Trower may feel hes living out of time, yet his talent and his music continue to pass the test of time.
