Fre\$h's new single - The Hottest featuring Mirage

A message from Fre\$h:

"I fell in love with music from an early age. I appreciated the feeling and energy that I received from it. The first time I recorded myself was unprofessionally with two tape decks around the age of 8 give or take a year. I would play an instrumental from a tape I was listening to and record myself with the other tape deck. So the feeling I got from listening to other artist was amplified tremendously when I began recording myself. My father was into music before I was thought about and was successful making the billboard 100 with the hit 'Bodymusic' by the Strikers. Although I was into music and recording myself I didn't really start to take it more seriously until the age of around 15 I would say. I had several notebooks I would write in from time to time. There are two things that inspired me to continue and that is the stories from life I would come up with and the feedback I would get from different people who heard me. It is my hope that people from all different walks of life can appreciate what I deliver just like movies bring in people from different backgrounds. I have performed in the Raleigh-Durham area in NC, Miami, FL, & the Bahamas each time well received. I do take short breaks once in awhile because I'm a father of two beautiful girls & a husband. Thanks for taking the time to read a little about me".
